DETAILED ACTION

Election/Restrictions

- 1) Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, 35-42, 43-52 and 67-73, drawn to an apparatus for transmitting responses to signals received, classified in class 340, subclass 601.
 - II. Claims 16-25, 53-60, drawn to an apparatus programmed to execute processes based on received data, classified in class 700, subclass 284.
 - III. Claims 26-34, 61-66, drawn to a method of initiating transmission of information, classified in class 340, subclass 870.01.

- 2) The inventions are distinct, each from the other because of the following reasons:

Inventions I and II and I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination II has separate utility such as a remote controlled apparatus and subcombination III has separate utility such as a transponder for sending signals. See MPEP § 806.05(d).

- 3) Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Due to the complexity of this restriction, no telephone election was attempted.

Art Unit: 2125

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
